

Memo from

To: Martin Pollock

JOSHUA LEDERBERG

DEC 26 1972

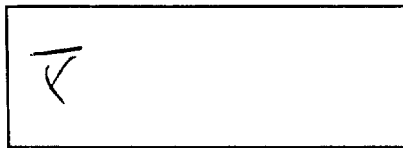

Your (much welcomed) reprint and letter of Oct. 25 ~~by~~ seamail have just arrived. Many thanks.

I will return the favor with some tidbits of historiography on the never-corresponding of Griffith and Avery.

I think I now have most of the text material mentioned in your 10/15 letter (and ff.)

Sincerely,

Did any ever believe
DNA was not important?
since Miescher, Feulgen?
and the knowledge that
viruses contained either
RNA or DNA?
